

MaxiFlex® Ultimate™

Designed and developed as a breathable glove, MaxiFlex® Ultimate™ has become the benchmark for precision handling in dry environments. Available in 8 sizes and 4 dip lines MaxiFlex® Ultimate™ offers you 48 gloves to get that perfect fit for the job you do.

AirTech® technology platform

360° breathability - patented micro-foam nitrile coating offers 360° breathability, making it the most breathable glove on the market today.

ErgoTech® technology platform

25% thinner - than most foam nitrile gloves on the market whilst offering twice the mechanical performance.

Form, fit and feel - mimics the "hand at rest", reducing hand fatigue and increasing comfort.

Latest knitting technology - utilized to produce smooth and rounded fingertips, improving fingertip sensitivity.

Consistent liner penetration - from the nitrile, leaving only the soft liner resting against the skin.

GripTech® technology platform

Optimized grip delivered through our micro-cup finish allows for a controlled grip.

Palm thickness 1.00mm
Silicone free

DuraTech® technology platform

MaxiFlex® has outstanding durability withstanding 18.000 abrasive cycles per millimetre thanks to the use of the DuraTech® coating technology in the coating construction. Per millimetre of coating MaxiFlex® has over twice the resistance of another other glove in its class.

HandCare® technology platform

All ingredients used in the manufacturing and construction of this product are compliant with the **REACH** legislation.

This glove has been laundered prior to final packaging making it **clean and safe** for use.

The **Oeko-Tex® Association** has evaluated and certified this product as skin safe from the second it comes into contact with the skin.

The **Skin Health Alliance** has awarded professional dermatological accreditation following review of the scientific dossier behind this product. View www.skinhealthalliance.org.

More information about **HandCare®** by ATG® is available at www.atg-glovesolutions.com.
